Low Voltage Technician | Systems Administrator | CCTV & Network Specialist

Professional Summary

Experienced and hands-on IT and low-voltage technician with 8+ years of experience supporting infrastructure and deploying physical tech solutions. Skilled in building and maintaining network systems, CCTV, access control, and smart technologies. Successfully developed internal automation tools and supported 1000+ user environments across 60+ remote offices. Currently pursuing California C-7 Low Voltage Contractor License to expand into legal project-based contracting.

Key Skills

- Low Voltage Installations (CCTV, Intercom, Access Control, Structured Cabling)
 - System Administration (macOS, Windows, Linux)
 - Networking (LAN/WAN, VPN, Routers, Access Points)
 - Scripting & Automation (Python, PowerShell, Bash)
 - Troubleshooting & Diagnostics (Hardware & Software)
 - Smart Home Devices & Surveillance Systems
 - Independent Field Work & Client Support
-

Professional Experience**System Administrator**

Enterprise Environment, 1000+ Users, 60+ Offices

2015 – 2022

- Managed IT infrastructure: servers, firewalls, routers, switches - Deployed and maintained CCTV systems, biometric and card-based access control - Created scripts for server maintenance and automated helpdesk workflows - Provided L2/L3 support across physical and virtualized environments - Led expansion of tech infrastructure for new offices and remote branches

Low Voltage / IT Technician (Freelance & Contract)

Los Angeles Area

2022 – Present

- Installed security systems (Reolink, Ubiquiti, Hikvision, etc.) - Ran Cat5e/Cat6 cabling for commercial and residential buildings - Mounted TVs, installed smart intercoms, setup surveillance with remote monitoring - Configured Wi-Fi mesh systems, routers, and network segmentation - Building client base and service portfolio for future C-7 licensed operations

⚙ Projects

- **Custom Telegram Bot:** Automated ticketing, FAQs, and resource distribution for internal IT team
 - **Home Lab Environment:** Configured VLANs, pfSense firewall, Synology NAS, and test automation scripts
 - **Client Camera Systems:** Hybrid NVR/cloud-based setups with mobile access and custom alerts
-

Education & Certification

- Self-taught in IT systems and low-voltage deployment
 - Preparing for **California C-7 Low Voltage Contractor License**
 - **Hikvision Certified Security Associate (HCSA)**
 - Completed training courses via YouTube and self-study on **Cisco, MikroTik, and LPIC (Linux Professional Institute Certification)** topics
-

Objective

Seeking to join a forward-thinking tech or security company where I can contribute my hands-on expertise in networking, security systems, and IT infrastructure, while gaining experience under my future C-7 license. Ready to work immediately, independently, and bring visible value from day one.
